

## What to do at a 'Radiographic Review'

The 'Radiographic Review' is used for taking a look at X-Rays, MRI results etc. It is highlighted in light blue on Cliniko. The Radiographic Review is usually 12 visits following the Report of Findings to assess where the patient is at with their care and the steps that will follow.

The appointment will be booked in the Chiropractic column of Cliniko. In this appointment the Chiropractor will be going through the patient's IR with them.

These steps will guide you through a Radiographic Review.

### The shift before the Radiographic Review

- 1. Call the Patient to confirm their appointment.**
- 2. Save the patient's IR into the iPad folder.**

### The Radiographic Review Appointment

**3. Set up the iPad.** When the patient arrives set the IR on the iPad. To do this, unlock the iPad (the password is 972843). Go into the dropbox. Click on the 'iPad' folder and open the patient's IR. Triple click the home button before giving it to the patient to look at to disable the patient from access to anything aside from their IR. Allow the patient to read through the Report and let them know that what it contains and that it is personalised with their X- rays and results.

**4. Take the patient to the following place for their consultation.**

- Montrose: Take the patient down to room 3 and give them the iPad with their IR open and on restricted access.
- Hawthorn: Take the patient down to the adjusting bay and give them the iPad with their IR open and on restricted access.

**5. Present the patient with the iPad to have a look at the report prior to speaking with Dr. Hooper. *Only following the consultation with the Chiropractor will the patient commence their care or rehab.***

**6. At the conclusion of the consultation upload the IR into the patients account on The Spinal Centre Website.**

**7. Book the client in for their next appointments. There are three treatment options after the RR that are tailored to the patient budget.** Read through Dr. Hooper's Patient Notes to know what to book the patient in for.

**8. When charging the patient, ensure that you also charge them with the Radiographic Analysis, Coding and Reporting Fee in addition to the treatment they have.**

**9. Inform the patient that their IR has been uploaded in their account on The Spinal Centre Website for their access. Send them an email to remind them of this. *It is***

***important to remember to upload the IR to the Patient Health Dashboard BEFORE informing them that it is there.***
